Looking for specialized biomedical laboratories and consultants?

BioAssayLINK™ is the first online service that will provide you with a list of labs and consultants that meet your specific needs.

Rapidly link your bioassay requirements with specialized biomedical researchers and providers in a specific location or region of the world. Requests are tailored to your requirements; ask very specific questions or keep the request broad. You decide.

Our matching service is rapid and cost effective.

Core benefits to you

- Access to a database of worldwide bioassay expertise
- Report of lab and consultant options tailored to your requirements provided within days
- Access to up-to-the-minute information
- Provides decision-maker with relevant and concise information
- Saves you time and money, increasing your efficiency
- Enables you to focus on core business

Getting Started

You are 3 easy steps away from making and receiving your first laboratory and consultant options request.

Step 1

Go to the BioAssayLINK website at www.bioassaylink.com and register via the Bioassay Seeker portal; registration only takes 2 minutes.

Step 2

Select 'Create Information Request' from the menu and select from the appropriate bioassay category – target molecule, animal model, specialized technique, genetic polymorphism or bioanalysis. Enter very specific information or keep it broad to locate the laboratories that meet your specific requirements. Limit your selection to one or more countries or regions. The choice is yours.

Your request will be acknowledged and you will be notified when your laboratory and consultant options report is complete to your specific requirements.

Step 3

Payment Method

To receive your report, pay by any of the following ways:

- Secure site for credit cards
- Invoice
- PayPal.

Your report will include all the appropriate information about the labs that **match your specific request**, such as:

- geographical location
- name of organization
- all contact details of the person responsible
- quality assurance levels
- competitive advantage and relevant publications.

What you decide to do with the information is entirely up to you. BioAssayLINK does not get involved in any contract negotiation. However, we do seek feedback to see whether a relationship progressed and whether the outcome was satisfactory.

Visit us today at www.bioassaylink.com for a free demo of how our system works.
